## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-2, 4, 6, 11-15, 22-23 and 26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Glushko in view of Oba, Usami or Bell.

Glushko discloses an optical recording medium and method of making comprising a substrate having pits thereon is covered with a fluorescent material in the pits only. The fluorescent material is a fluorescent dye in a polymer and solvent. The medium may comprise more than one layer of fluorescent dye-filled substrates. (See col. 4, lines 21-23 and Figure 2F). It is recognized that the reference does not disclose the specific dye material, plastisizers, light stabilizer, or surfactant. However, all three secondary references disclose dye-in-polymer recording layers having plastisizers, surfactants and light stabilizers added thereto. One would be motivated to include these aditived is the Glushko medium by the reasoned expectation of obtaining a recording layer with improved properties such as adherence, Tg, etc. The reference also disclose it is known to use the claimed dyes, such a xanthene dyes, in dye-in-polymer recording layers.

Claims 3, 5, 7-10, 16-21, and 24-25 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
